Iran says it has put ‘guided warheads’ on missiles that can reach Israel

State media: New Khoramshahr 2 is highly accurate, can carry two-ton payloads up to 2,000 kilometers (1,250 miles)

In a statement, Pompeo said the missile test violated United Nations Security Council Resolution 2231, which was adopted as part of the 2015 nuclear deal curbing Iran's nuclear program and bans Iranian tests of nuclear-capable ballistic weapons.

As we have been warning for some time, Iran's missile testing and missile proliferation is growing. We are accumulating risk of escalation in the region if we fail to restore deterrence," Pompeo said.

NATIONAL REVIEW

Life Is Under Attack

By [MIKE PENCE](#) January 31, 2019 11:46 AM - (EMPHASIS MINE)

Look at how far the Democratic party has fallen.

This week, a delegate to the Virginia state legislature introduced a bill affirming **abortion up to the moment of birth**. In shocking testimony, the delegate admitted that even when it was obvious that a child was about to be born — in the 40th week of a pregnancy, even in the midst of active labor — this proposed law would allow for the child to be aborted, so long as a single doctor approves.

Governor Ralph Northam, a supporter of the bill, went even further in a radio interview the next day. He tried to reassure its opponents that if a child survived an abortion, “the infant would

be kept comfortable. [And] the infant would be resuscitated if that's what the mother and the family desired, and then a discussion would ensue."

There's another word for this: infanticide. And it is morally reprehensible and evil.

Virginia's bill comes just a week after the New York state senate was filled with cheers following the passage of a similar law. Governor Andrew Cuomo declared it "a historic victory for . . . our progressive values" and directed pink lights to shine on landmarks throughout the state, including One World Trade Center.

This shameless embrace of a culture of death is startling to every American who cherishes life. Not too long ago, the Democratic party's stated position was that abortion should be "safe, legal, and rare." It was this widespread rejection of late-term abortion that led a large bipartisan majority in Congress to pass the partial-birth-abortion ban in 2003. But now look at how far the Democratic party has fallen.

To support, let alone cheer, late-term abortions not only marks a disturbing step backward by so-called "progressives" — it also violates every demand of human decency. As modern science has moved the point of viability ever earlier in pregnancy, most Americans have agreed that a child who can survive outside the womb deserves a chance at life. **Only a handful of countries, including China and North Korea, allow late-term abortions.**
